I am passionate about technology and constantly exploring innovative solutions. My goal is to work as a front-end developer or web designer. With experience in managing app development projects and completing various courses in front-end development and software programming, I am prepared to contribute to digital advancements and create impactful solutions in the tech industry.

Work Experience

Yayasan Al-Hadiid   **2023 - Present**

An institution that manages various educational, religious, and humanitarian units.

Manage and maintain the school website, ensuring content is always up to date and relevant, optimizing website performance, publishing the latest information, and implementing new features according to school needs.

BIBU AMDK   **2022 - 2024**

Assist in recapping data from various sources such as invoices into Excel, designing posters and banners for company needs, and producing attractive visual designs that suit the company's needs.

Education

S1 Sistem Informasi UIN Syarif Hidayatullah Jakarta   **2024 - Present**

- Learned methodologies for software project management and development.
- Developed competencies in designing and developing websites.
- Gained knowledge in designing and managing database systems.
- Acquired skills in various programming languages for software development.

Skills

Hard skills

- **Computer and Technology:** Experience using Microsoft Word, Excel, PowerPoint, and various other IT software.
- **Programming:** Experience learning several programming languages and various frameworks such as HTML, CSS, JS, Python, Java, MySQL, PHP, C#, Laravel, Tailwind CSS, GitHub, etc.
- **Graphic Design:** Experience using graphic design software like Inkscape, Figma, Canva, and Blender.

Soft skills

Possesses good leadership skills in leading a team to achieve common goals and effective communication to convey information. Able to work collaboratively in a team, responsive and quick in completing tasks, and skilled in time management to finish tasks on time.

Project

- **Personal Website:** Created using HTML, CSS, and JavaScript with Apps Script for custom features, used to showcase my work and personal information online.
- **Tech Edify Mobile App:** An Android app using Google Spreadsheet for learning materials, designed for high school students to learn informatics interactively.
- **WordPress-Based Informatics Learning Website:** Developed a WordPress website for informatics learning, featuring 3D flipbooks for materials, quizzes, Techie assistance (admin bot), and discussion/comment sections for each material, similar to the Tech Edify mobile app but in a web format.
- **UI Design for Yayasan Al-Hadiid Website:** Designed a user-friendly and visually appealing interface using Figma, ensuring the design reflects the foundation's values and mission.
- **Globe Trekker Travel Platform Design:** Designed a travel platform focusing on an intuitive user experience, including features like login, booking, and supporting pages, with visual elements reflecting the Globe Trekker brand identity.
- **Sky Solutions - Website Iclimate Change:** A climate change website featuring tools to calculate vehicle carbon footprints and check weather conditions through API integration.

Licience and Certification

- **Organization:** Ketua Divisi Sosial dan Humas OSIS SMA dan Duta SMA Al-Hadiid
- **Fundamental Programming:** Brightcamps Coding, CODEPOLITAN (Dasar Pemrograman Komputer), Dilesin (Dasar Pemrograman C++), Sololearn (Introduction to Python), Dicoding (Programming Logic 101, Dasar Pemrograman Web)
- **Web Development:** Digital Skill Fair Dibimbing (Front-End Development), Harisenin Coding Camp (Front-End Developer), AlwaysNgoding (HTML, CSS, JS, PHP, MYSQL)
- **Programming Language:** CodingStudio (Fundamental Python, Fundamental Java), Dicoding (Software Developer, Data Visualization, Dasar Pemrograman JS), DQLab (R Fundamental for Data Science)
- **UI/UX Design:** Digital Skill Fair Dibimbing (UI/UX Design)
